# HISTORICAL ROUTES OF LAND AND WATER

A RURAL LANDSCAPE TO SAFEGUARD

## PEDALING BETWEEN THE PIAVE RIVER AND THE LAGOON

Itinerary suggested by FIAB S. Donà di Piave VIVILABICI - WWW.VIVILABICI.IT

**From San Donà to Musile through the Ponte della Vittoria bridge and then on to the "Al Tajo" tavern. You then bike on a dirt road ("restèra" of Piave Vecchia) to Caposile. From here to S. Maria di Piave along Via Salsi and the pedestrian/cycling bridge.**

You continue along Via Francescata to Passarella and then, along secondary roads, you return to the provincial road on the bank of the Piave river. Passing by the gate known as "Porte del Tajo" (location Intestadura) you return to the bridge across the Piave river and then to the city centre of San Donà. It is an

interesting itinerary both from a landscape and a naturalistic point of view. It is approximately 25 km long (\*) and develops on mixed route, so it is advisable to ride it on a city bike or on a mountain bike.

**Overall length: km 24.6 (of which 6.5 on a dirt road)**

**DEPARTURE AND ARRIVAL:  
S. DONÀ**
